LIQUID FENCE®

Deer & Rabbit Repellent

The Liquid Fence Story

Clark Kaskie, a retired chemical engineer, moved to the Pocono Mountains of Pennsylvania in 1980. As an avid gardener, it took no time to see his plants were being eaten by the "native critters". He tried everything from homemade remedies to costly commercial products to try to stop the damage the animals were causing, but nothing worked. Clark decided to make his own repellent that would not only really work, but be safe for the environment. After years of experimenting, he finally had success! When he shared it with his friends, they told him it could be the savior of many frustrated gardeners and convinced him to market it. His wife, Rosemary, said, "Clark, this works just like a liquid fence". The rest is history!

3 Easy steps to guaranteed protection from deer and rabbits!

Rain Resistant!

Directions:

1 **SHAKE WELL before each use!**

2 Add 8 ounces of **Liquid Fence® Concentrate** for each gallon of water and thoroughly mix.

3 With garden sprayer or sprinkler, apply liberally to plants and their perimeter during a dry period.

Repeat process 1 week later and then approximately once per month thereafter. Areas where feeding pressure from deer and rabbits is intense, spray **Liquid Fence® Deer & Rabbit Repellent** once a week for 3 weeks and then approximately once per month thereafter. This will "train" the animals to avoid your yard! Please note: when using **Liquid Fence** you may notice an odor, however, once it dries, the odor will not be noticeable to humans, but still very noticeable to animals.

How it works... Homeowners, gardeners, professional landscapers and commercial growers have discovered **Liquid Fence** stops deer and rabbit damage – naturally!

Unlike other deer and rabbit repellents that require the animals to browse to be effective, **Liquid Fence** works on scent, so deer and rabbits don't even have to take a bite to be repelled. Because the animals' natural aversion to this scent will never diminish, **Liquid Fence** DOES NOT have to be rotated with other repellent brands.
